Temperature correction graph

Soaking time below the reference time of one hour causes a positive correction value, while soaking time above causes a negative value.

fired at different soak times under air and the atmospheric pressure

Soaking time (h)	1/2	1	2	4	8	10
Correction (°C)	17	0	-7	-15	-25	-30
Example	903	920	927	935	945	950
